# Intento de última hora para salvar las leyes de restauración de la naturaleza de la UE 

Un esfuerzo de última hora para intentar salvar las leyes de restauración de la naturaleza de la UE de la extinción ha sido montado por 11 estados miembros, que compiten para lograr la legislación en las próximas cuatro semanas.
En un movimiento liderado por Irlanda, 11 ministros de medio ambiente han escrito a los países que han dicho que se abstendrán o votarán en contra de la ratificación de las leyes, instándolos a reconsiderar.

"Europa es el continente que se está calentando más rápidamente y está enfrentando impactos sin precedentes de las crisis entrelazadas de la naturaleza y el clima", escribieron los ministros a sus contrapartes en países como Hungría, Suecia, Bélgica, Finlandia, Austria y Polonia.
Entre los países que firmaron la carta se encontraban Alemania, Francia y España. También firmaron la República Checa, Dinamarca, Estonia, Chipre, Luxemburgo, Lituania y Eslovenia. El ministro de medio ambiente de Irlanda, Eamon Ryan, dijo: "Debemos actuar urgentemente y decididamente para concluir el proceso político. El fracaso en hacerlo sería una carta blanca para destruir la naturaleza y socavaría fundamentalmente la confianza pública en el liderazgo político de la UE en casa y a nivel internacional."
Los partidarios de las leyes temen que si no se ratifican en julio, cuando Hungría asuma la presidencia de la UE, nunca serán revividas.
Las leyes, que llevan dos años en proceso, obligarían a los estados miembros a restaurar al menos el $20 \%$ de los hábitats terrestres y marinos en malas condiciones a un buen estado para 2030, aumentando al $60 \%$ para 2040 y al $90 \%$ para 2050. Esto se mediría en parte por las poblaciones de mariposas de pradera y aves de granja.

## Año Porcentaje de hábitats restaurados

2030 20\%
2040 60\%
2050 90\%
La legislación también exige la plantación de 3 mil millones de árboles y la adopción de medidas para garantizar que no haya pérdida neta en la cantidad total de espacio verde urbano en Europa.
Los eurodiputados aprobaron las leyes en febrero después de una serie de enfrentamientos con políticos de centro derecha que parecían aterrorizados por el auge de la extrema derecha, dispuesta a utilizar las protestas de los agricultores para atacar a la UE.
Para entrar en vigor, las leyes necesitaban la aprobación final de los estados miembros mediante mayoría cualificada.
En una cumbre de líderes en marzo, Suecia, los Países Bajos e Italia se opusieron, pero el proyecto de ley aún contaba con una estrecha mayoría para ser aprobado en una reunión de
ministros de medio ambiente unos días después. En el último momento, Hungría cambió de opinión.
Los ministros advirtieron que no ratificar las leyes destruiría la reputación de la UE a nivel internacional, dado el liderazgo que había tomado en el marco global de biodiversidad de Kunming-Montreal, que fue adoptado por la Unión Europea y los estados miembros en diciembre de 2024.
La carta decía: "El fracaso en hacerlo significaría que tendremos que acudir a la conferencia de la ONU sobre biodiversidad en Cali, Colombia, en octubre de este año y decir que estamos retractándonos de nuestras promesas internacionales de proteger nuestras tierras y mares." La próxima oportunidad para una votación es el 17 de junio en Luxemburgo, cuando se reúnan nuevamente los ministros de medio ambiente. Las fuentes dijeron que solo necesitan que un país cambie de bando.
